EDUCATION

Atharva University, Mumbai — Bachelor of Computer Applications (BCA)
2025 – 2028 | First Semester Score: **95.7%**

Manitoba Institute of Trades and Technology (MITT), Canada — Diploma in
Software Development
2020 – 2021

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C#, SQL, PHP

Frontend: React, Next.js, Tailwind CSS, HTML, CSS

Backend: FastAPI, REST APIs, PostgreSQL, Supabase

Automation & AI: Playwright, Selenium, Gemini API, FFmpeg

Tools & Concepts: Git, Async Processing, Real-Time Systems, Vector Embeddings,
State Management, Schema Validation

PROJECTS

[The Director — AI Video Clipping Platform](#)

Python • FastAPI • FFmpeg • Gemini API • Next.js • Tailwind CSS

- Built a full-stack AI-powered system that transforms long-form gameplay footage into ranked short-form clip opportunities.
- Engineered an asynchronous processing pipeline using FastAPI background jobs and chunk-based FFmpeg workflows for scalable video analysis.

- Designed real-time frontend polling architecture with dynamic React state management for long-running AI processing tasks.
- Generated structured editor-ready outputs including ranked clip metadata, markdown editing guides, and DaVinci Resolve `.ed1` exports.
- Developed a premium dark-mode dashboard with drag-and-drop uploads and dynamic result rendering.

AI Job Copilot — Intelligent AI-Powered Job Application System (Work In Progress)

Python • FastAPI • Gemini API • PostgreSQL • Playwright • React

- Designing a modular AI system that analyzes job descriptions, computes candidate-job fit scores, and generates tailored resumes using truthful user data only.
- Architecting scalable backend pipelines using FastAPI, PostgreSQL, vector embeddings, and structured LLM workflows.
- Planning hybrid matching systems combining rule-based scoring with AI-assisted reasoning for resume-job alignment.
- Building automation workflows using Playwright to support intelligent job application assistance.
- Designing modular LLM abstraction layers for future multi-model compatibility and scalable orchestration.

SmartQR Menu OS — Real-Time Restaurant Command Center

Next.js • React • Supabase • PostgreSQL • Tailwind CSS

- Developed a real-time digital menu platform enabling restaurants to instantly update sold-out menu items across all customer devices without refresh.
- Built live synchronization systems using Supabase Realtime Channels for menu updates and service requests.
- Implemented admin dashboard workflows for inventory availability management during high-pressure restaurant operations.
- Designed scalable relational database schemas supporting restaurants, menu categories, and live service workflows.
- Created mobile-first customer experiences optimized for fast-paced hospitality environments.

Live Demo: smart-qr-menu-omega.vercel.app

Tathya-Satyapan — AI Fact Verification Chrome Extension

JavaScript • Chrome Extension API • Gemini API

- Built a Chrome extension that detects suspicious Instagram claims in real time using a hybrid AI-powered verification pipeline.
- Designed a 3-layer detection system combining regex heuristics, AI verification, and structured confidence scoring.
- Improved scalability using `MutationObserver`, `IntersectionObserver`, request queues, and duplicate-scan caching.
- Injected native-style UI warning badges directly into dynamically loaded social media content.

EXPERIENCE

Sous Chef / Kitchen Operations Lead — Joey Polo Park, Canada

2017 – 2025

- Led teams of up to 40 staff members during high-volume service operations in fast-paced environments.
- Built internal preparation workflows that reduced setup time from ~2 hours to ~1 hour.
- Managed communication between kitchen teams and upper management during peak service periods.
- Trained junior staff and solved operational issues in real time under pressure.

EXPERIENCE & LEADERSHIP HIGHLIGHTS

- Completed a Full Stack Developer internship at Tactica Communications Inc., contributing ~320 hours across modern web development workflows and team-based engineering tasks.

- Received professional recommendation letters recognizing leadership, reliability, adaptability, and technical growth in both engineering and operational environments.

CERTIFICATIONS

- Scrum Fundamentals Certified

Professional Interests

- Strong interest in AI systems engineering, scalable SaaS architecture, and intelligent automation workflows
- Comfortable learning new technologies rapidly and building end-to-end systems independently
- Seeking software development, AI engineering, automation, or full-stack internships
